

STAGING

Our team wants your home to be shown in the best possible light to prospective buyers to get you top dollar in the shortest amount of time. We will create a warm and inviting environment focusing on the best architectural features and selling points of your home.

Staging is a proven technique to maximize your most valuable asset. The benefits are numerous, essential, and profound.

- Faster and higher sale price. Staged homes sell for an average of 7% more money than un-staged homes
- Staging is always less than your first price reduction
- Your property will appeal to more buyers if it has been staged
- Realtors will want to show your home
- Your home will have a “WOW” factor that other homes in the area do not have
- Helps reduce the stress regarding your upcoming move
- Vacant homes often take much longer to sell
- Professionally staged listings appear move-in ready and well maintained to buyers
